

SAUK VALLEY COLLEGE BOARD OF TRUSTEES MEETING  
Third Floor Conference Room 3L14  
August 27, 1979 8:00 p.m.

- A. Call to order
- B. Roll call
- C. Written communications from visitors
- D. Recommended actions:
  - 1) Approval of minutes as submitted
  - 2) Approval of Treasurer's report
  - 3) Approval of current bills for payment
  - 4) Approval of current payroll journal
  - 5) Personnel matters
    - a) Resignation
    - b)
  - 6)
  - 7)
  - 8) Other items
- E. Old business:
  - 1) RAMP
  - 2) Raths, Raths & Johnson
  - 3) Board Meeting Schedule
  - 4) Other items
- F. New business:
  - 1) Funding 1981 - 1985
- G. President's report:
  - 1) Student trustee report
  - 2) Minutes of committee meetings
  - 3) Report on the bike path
  - 4) Enrollment
  - 5) Adult Education Offerings
  - 6) Physical Education Department
    - Presentation
  - 7)
  - 8)
  - 9) Other items

MINUTES OF THE SAUK VALLEY COLLEGE BOARD OF TRUSTEES MEETING

August 27, 1979

The Board of Trustees of Sauk Valley College met in regular meeting at 8:00 p.m. on August 27, 1979 in the Board Room of Sauk Valley College, Rural Route #1, Dixon, Illinois.

Call to Order: Chairman Reigle called the meeting to order at 8:00 p.m. and the following members answered roll call:

John Fassler	Kay Fisher
Lorna Keefer	Oscar Koenig
Juanita Prescott	William Reigle

Absent: Ann Powers Bruce Yearian

Minutes: It was moved by Member Keefer and seconded by Member Fisher that the Board approve the minutes of the August 13 meeting as presented. Motion voted and carried.

Treasurer's Report: It was moved by Member Prescott and seconded by Member Keefer that the Board approve the Treasurer's Report as presented. In a roll call vote, all voted aye. Motion carried.

Bills Payable: It was moved by Member Keefer and seconded by Member Fisher that the Board approve the bills in the following amounts:

Educational Fund	\$306,210.60
Building Fund	45,963.93
Site & Construction	8,675.70
Insurance Fund	15,000.00

In a roll call vote, all voted aye. Motion carried.

Payroll: It was moved by Member Koenig and seconded by Member Prescott that the Board approve the payroll of July 15 in the amount of \$40,517.49, the payroll of August 1 in the amount of \$105,123.71 and the payroll of August 15 in the amount of \$53,477.12. In a roll call vote, all voted aye. Motion carried.

Resignation: It was moved by Member Fisher and seconded by Member Koenig that the Board accept with regret the resignation of Wayne Holland, Asst. Professor of Business. Motion voted and carried.

- RAMP: It was moved by Member Koenig and seconded by Member Keefer that the Board approve the RAMP report as presented at the August 13 meeting. In a roll call vote, all voted aye. Motion carried.
- Raths, Raths & Johnson Report: Dean Edison reported that funds for emergency repairs, such as the columns in the gymnasium, might be available from the state through the Capital Development Board. He said he did not have much hope of receiving these funds for the fiscal year 1980 as this money has already been allocated.
- It was moved by Member Prescott and seconded by Member Koenig that the Board authorize Dean Edison to continue his correspondence with the Illinois Capital Development Board in an effort to obtain funding for needed building repairs. In a roll call vote, all voted aye. Motion carried.
- Board Meeting Schedule: Discussion was held on reducing the number of Board meetings to one per month. Dr. Cole indicated that out of approximately 38 community colleges in the state, only about seven have two meetings per month. He noted that there were times when it was hard to come up with items for the agenda. The Board suggested special workshops be held at the first meeting per month.
- Five-year Financial Plan: Dr. Cole distributed materials received from the Illinois Community College Board and the Illinois Board of Higher Education at a recent financial planning workshop held in Springfield. The implications of this plan (including a new method of funding equalization) will be discussed in a mid-year workshop on financial planning for the next five years.
- Easter Break: It was moved by Member Prescott and seconded by Member Koenig that the Board approve changing the spring break from the first week in April to April 7 through April 11, 1980. Motion voted and carried.
- Committee: Chairman Reigle appointed Kay Fisher and Juanita Prescott to serve on a committee to investigate the history of student loans, bad debts, and other financial aid policies.

President's  
Report:

Dr. Cole reported enrollment as of 8 p.m. this evening to be 18,901 as compared to 19,003 credit hours at the same time last year. He also reported on the bike trail, car pools, Back to School Dance on August 31 and the soccer games scheduled for August 29 and August 31 of this week. A special presentation on the Physical Education Department was presented by Claire Holmberg and Frank Palumbo.

Executive  
Session:

At 9:45 p.m. it was moved by Member Prescott and seconded by Member Koenig that the Board adjourn to executive session to discuss Grievance #17. In a roll call vote, all voted aye. Motion carried.

Regular  
Session:

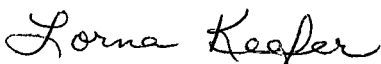

At 10:37 p.m. it was moved by Member Prescott and seconded by Member Fassler that the Board return to regular session. In a roll call vote, all voted aye. Motion carried.

Adjournment:

Since there was no further business, it was moved by Member Fisher and seconded by Member Koenig that the Board adjourn. The next regular meeting will be 8:00 p.m. September 10. In a roll call vote, all voted aye. Motion carried.

The meeting adjourned at 10:38 p.m.

Respectfully submitted:

Lorna Keefer, Secretary

# SAUK VALLEY COLLEGE

RURAL ROUTE ONE,

DIXON, ILLINOIS 61021

DATE August 27, 1979

## MEMORANDUM

TO: Sauk Valley College Board of Trustees

FROM: Dr. George E. Cole

The attached materials from the Illinois Community College Board and the Illinois Board of Higher Education were distributed at a finance workshop held in Springfield last Friday which was attended by Dean Edison and myself.

The actual implication of this five-year plan for Sauk Valley College is generally positive, however, the details are somewhat complicated. It is my intention that sometime later in the year during a budget workshop, the actual implications of this plan will be discussed in depth.

mv  
enc.

## COMMUNITY COLLEGE FINANCE - RECOMMENDATIONS

### Resource Requirements Analysis

1. Resource requirements would be based on an analysis of projected resource needs and priorities for the community college system for the next fiscal year.
2. The resource requirements analysis would utilize the latest available systemwide weighted average (i.e., mean) unit cost.

*This recommendation represents no change in current procedures. The weighted average unit cost reflects total expenditures divided by total credit hours.*

3. Costs would be adjusted to reflect budget year decisions relative to salary increases, price increases and other resource needs that can be addressed through credit hour grants.

*This recommendation represents no change in current procedures, although it places additional emphasis on providing flexibility to address specific needs and priorities of the community college system through the credit hour grant mechanism.*

4. The resource requirements analysis would be based on estimated FTE enrollments for the current fiscal year (i.e., FY'81 recommendations would be based on FY'80 FTE enrollments). The estimate would reflect enrollment trends established in the Fall of the current year by multiplying total FTE enrollments for the preceding year by the ratio of fall tenth day enrollments for the current year divided by fall tenth day enrollments for the preceding year (i.e., the FTE enrollment utilized in FY'81 budget recommendations would be equal to total FTE enrollments in FY'79 multiplied by FTE enrollments in Fall FY'80 divided by FTE enrollments in Fall FY'79). Credit hour grants and equalization grants would also be calculated and distributed on the basis of past year's enrollment data, adjusted as defined above. (see recommendation 24 below).

*This recommendation does not represent a fundamental change in the current financing plan. However, the enrollment utilized for the budget year would be identical to the enrollment calculated for the current year. This procedure will reduce the amount of uncertainty in determining the projection of enrollments for the budget year. Fall term enrollments for the current year will be known as the budget is developed so that any dramatic changes already apparent from actual data can be reflected in the budget process.*

*If this recommendation had been implemented in FY1980 and all other factors were held constant, the total appropriation for FY1980 would have been significantly smaller. This is because enrollment growth was projected*

from FY1979 to FY1980. If such enrollment growth does not occur under the current funding plan, the full appropriation cannot be spent. This proposal sacrifices the advantage of being able to project enrollment growth in order to achieve certainty in the amount of money available to local districts and eliminate lapses in appropriated funds. If this procedure had been implemented in FY1979 the total appropriation for community colleges would have been smaller, but the amount actually received by the colleges would have been larger. Also, the colleges would have known the amount available for FY1979 last July as they developed their local budgets.

5. The resource requirements analysis would incorporate categorical funding for new program development costs (i.e., the "start up" costs that are required to initiate a new program). These resources would be committed to individual districts when a new program is approved by the ICCB and the BHE. These amounts would not be distributed through credit hour grants and would be non-recurring.

The major impact of this recommendation is to recognize explicitly the costs associated with the development of a new community college program. Community colleges as part of their requests for approval of new programs would specify the developmental support required (i.e., personnel costs, equipment, library materials) and these costs would be considered in the approval process. Costs to support new program development would not include support for continued operations that would be provided through credit hour grants after the new program had been implemented. In order to receive timely new program development support under this recommendation, community colleges will find it necessary to plan and seek approval for new programs well in advance of the intended date of implementation.

6. Other categorical support for high priority operating budget needs (e.g., for equipment, library materials) would be incorporated when justified in any fiscal year by an analytical study. These resource requirements would be distributed to individual districts based on the appropriate parameter(s).

This recommendation places additional emphasis on the analysis of specific needs and priorities of the community college system. It also permits support to be distributed through a variety of mechanisms in addition to credit hours. The emphasis in providing categorical support would be on a systemwide analysis of needs and priorities, although the possibility of addressing priorities that may affect a limited number

number of districts is not precluded (i.e., when inadequate funding in a particular program area, such as ABE/GED instruction, can be demonstrated).

7. Resource requirements to support disadvantaged students would be considered categorical support that is restricted to providing special services for disadvantaged students (e.g., counselling, tutoring, career guidance). Disadvantaged student support would be earmarked for each community college campus through a basic grant (a fixed amount per campus) with the remainder allocated on the basis of credit hours offered by the community college campus in the "remedial-developmental" and "adult basic education (ABE) and general educational development (GED)" categories (see 17 below). Before receiving the funds earmarked for disadvantaged student support the community college campus would need to obtain ICCB approval of its proposed plan for providing disadvantaged student services.

*This recommendation maintains the current framework for awarding disadvantaged student grants. However, it bases this allocation on credit hours in two new categories: "remedial-developmental" and "ABE/GED", which are part of general studies, instead of making this allocation on the basis of credit hours in remedial developmental instruction as is done in the current financing plan.*

8. Resource requirements for public service activities would be based on historical expenditures, adjusted to reflect budget year decisions relative to salaries and prices. Periodically, the needs and priorities for public service would be reviewed and necessary adjustments would be reflected in resource requirements.
9. Each fiscal year an analysis would be made of unit costs across funding categories and plus or minus adjustments would be made if historical cost trends indicate an over or under commitment of resources to the funding category. These adjustments would be reflected in resource requirements and in the weighted average unit costs utilized in each funding category as a basis for distributing credit hour grants.

*Recommendations 8 and 9 permit the analyses of resource requirements to focus on the needs of instructional and public service activities in community colleges. While they have no systematic impact on resource requirements, they will permit adjustments to be made in specific areas when the need is identified.*

### Standard Local Contribution Analysis

10. Standard local contributions would be determined to reflect statewide expectations relative to tuition, local tax revenues and other federal, state and local revenues. The total standard local contribution would be the sum of 11 through 13 below.
11. The standard local tuition contribution would be 20% of the statewide weighted average instructional costs for the budget year. No tuition contribution for credit hours in Adult Basic Education (ABE) or General Educational Development (GED) would be included in the standard local tuition calculation.

The first part of this recommendation establishes a standard tuition contribution that is based on 20% of budgeted instructional costs rather than on the median tuition rate (i.e., \$13.10 in FY'80) utilized in the current financing plan. The second part of this recommendation eliminates the current expectation that tuition be charged for credit hours in the adult basic education (ABE) and general education development (GED) category of instruction.

The elimination of tuition expectations for ABE/GED instruction excludes approximately 690,000 credit hours from the standard local tuition contribution. A tuition rate of 20% of budgeted unit cost for the remaining categories of instruction would have yielded a \$13.75 rate per credit hour given the level of instructional cost for these categories recommended by the BHE in FY'80. The following table demonstrates the effect of this recommendation in FY'80 compared to the procedure used in developing the BHE's FY'80 budget recommendations.

<u>Current Plan</u>	<u>ABE/GED</u>	<u>Other Categories</u>	<u>All Categories</u>
Tuition rate	\$ 13.10	\$ 13.10	\$ 13.10
Student credit hours	<u>690,000</u>	<u>4,380,000</u>	<u>5,070,000</u>
Total revenue	\$9,039,000	\$57,378,000	\$66,417,000
<u>Recommended Plan</u>			
Tuition rate	-0-	\$ 13.75	\$ 11.88
Student credit hours	<u>690,000</u>	<u>4,380,000</u>	<u>5,070,000</u>
Total revenue	-0-	\$60,225,000	\$60,225,000

Thus, the net result of this recommendation is that the standard local tuition contribution would have been approximately \$6.2 million less under the recommended plan as compared to the current plan.

12. The standard local tax contribution would be based on total accrued tax revenues for the most recent historical year, adjusted for collection losses, cash flow considerations, and non-district charge-backs. The growth rate of Equalized Assessed Valuation (EAV) for the past three years for which actual data are available would be utilized to adjust the standard local tax contribution to the budget year. Equalization grants (see 22 and 23 below), provided to districts that are unable to meet the standard tax contribution, would be considered revenue towards meeting the standard defined above. Adjustments to the standard tax contribution would be made when necessary to compensate for statutory changes that affect the local tax base.

*This procedure uses an estimate of local tax revenues in the budget year for the standard local tax contribution. Because total accrued tax revenues are slightly higher than the amount utilized for the standard tax contribution in the current financing plan (i.e., calculated by multiplying the median tax rate by the statewide EAV), this recommendation would increase the standard local tax contribution. This difference would have resulted in an approximately \$1.2 million greater standard local tax contribution than the procedure utilized in developing the FY'80 budget recommendations.*

*The procedure recommended for projecting future tax revenues substitutes an historically established trend for projections developed each year by state agency staff. The difficulty of making accurate projections has created a number of problems in the budget process. The use of a known growth factor, up-dated annually, will provide a self-correcting, reasonably accurate estimate of future revenues. The average annual growth rate in EAV for the past three years has been 7%. Although this rate is higher than the growth rate projected in the BHE's FY'80 budget recommendations (i.e., 4%), more recent information suggests that the 7% growth rate would have been a better estimate. The use of a 7% growth rate would have resulted in a standard local tax contribution that was about \$3.8 million higher than that utilized in the BHE FY'80 recommendations.*

*From time to time technical adjustments may be necessary to reflect statutory changes in the local tax base such as the elimination of the corporate personal property tax. These adjustments would be made within the procedural and philosophical framework specified above, but the technical details would depend upon the specific statutory changes.*

13. The standard local contribution from other state, federal and local revenues would be a percentage of total resource requirements; this percentage to be determined annually based on the total revenues actually received from other state, federal and local sources in the year of the unit cost study that is utilized to estimate resource requirements.

The primary thrust of this recommendation is to establish a standard percentage of resource requirements to be funded from miscellaneous state, local, and federal revenues. The percentages used are based upon past experience. Currently, actual local projections of revenues from these sources have been used. The current procedure creates the possibility that projected growth in these revenues could be greater than the projected growth of resource requirements. Thus, a greater share of the total revenues would be budgeted from these sources than is reflected in the cost study used to estimate resource requirements.

In effect, this recommendation holds the percentage from these revenues constant at the level reflected in recent experience. This will assure that unusual growth in these revenues will not substitute for other sources of funds.

14. DAVTE grants would not be included in the standard local contribution, but would be considered categorical support that is applied to the vocational-technical credit hour grant categories (i.e., the business, technical and health categories - see 20 below).

*This recommendation represents no change from the current procedure for handling DAVTE grants.*

15. State Board of Education (SBE) grants for ABE/GED instruction would not be included in the standard local contribution but would be considered categorical support that is applied to the ABE/GED credit hour grant category (see 21 below).

*This procedure differs from that utilized in the current financing plan which includes SBE grants for ABE/GED instruction in the standard contribution from other state, federal and local sources. This recommendation would apply these grants to the ABE/GED category only in a manner that is consistent with the procedure utilized for DAVTE grants.*

#### Credit Hour Grants

16. Grants to support instruction would be distributed on the basis of credit hours.
17. General Studies would be split into three new categories: (1) remedial/developmental, (2) Adult Basic Education (ABE)/General Educational Development (GED), and (3) all other general studies - making a total of 7 credit hour grant categories. Credit hours associated with vocational skills that are currently included in general studies

would be assigned to a vocational-technical category (i.e., business, technical or health) when appropriate.

18. The credit hour grant amount to be distributed to each category would equal total resource requirements per credit hour adjusted for categorical support per credit hour (see 19, 20 and 21 below) minus the total standard local contribution per credit hour (see 11 through 13 above).
19. Disadvantaged student grants would not be distributed through the credit hour grant mechanism, but would be earmarked for each community college campus through the allocation of a basic grant (a fixed amount for each campus) with the remainder of resource requirements for disadvantaged students allocated on the basis of credit hours in the remedial-developmental and the ABE/GED categories (see 7 above). Since recurring disadvantaged student grant resources are included in historical unit costs it will be necessary to apply an adjustment for this recurring amount to each credit hour grant category.

*This recommendation does not change the procedure for determining and distributing disadvantaged student grants that is reflected in the current financing plan.*

20. The amount of DAVTE grants would be deducted from the credit hour grant amounts distributed to the corresponding business, technical or health categories.
21. The amount of SBE grants for ABE/GED programs would be deducted from the credit hour grant amounts distributed to the ABE/GED category. However, no local tuition contributions would be applied to the ABE/GED category.

*The basic approach of the credit hour grant calculation is not changed by these recommendations, but the changes made in the general studies category, the exclusion of tuition for ABE/GED instruction, and the application of SBE revenues strictly to the ABE/GED category all affect the distribution of funds for credit hour grants.*

*The actual amount of the credit hour grant in each category would also be affected by the amount of support provided for categorical needs and the means by which such support is distributed (see 6 above).*

*The following table illustrates the impact of the changes to the general studies category on credit hour grants. It is important to stress that this table shows the relative affects of the recommended changes, not the absolute amount of each grant under the proposed plan. For comparison purposes the grants were assumed to equal the total recommended by the IBHE for FY1980. No categorical aid other than SBE/DAVTE revenues is assumed.*

Illustration of Credit Hour Grants Under Proposed Plan

	<u>Projected FY1980 Unit Cost</u>	<u>Less SBE/ DAUTE Grants</u>	<u>Less Tuition</u>	<u>Less Tax and Other Revenues</u>	<u>Credit Hour Grant</u>	<u>IBHE Recommended Credit Hour Grant in FY'80</u>
Baccalaureate	\$ 68.69	\$ --	\$ 13.75	\$ 29.18	\$ 25.76	\$ 26.60
Business	61.95	4.04	13.75	29.18	14.98	16.80
Technical	75.77	8.08	13.75	29.18	24.76	25.86
Health	97.81	13.46	13.75	29.18	41.42	42.78
Remedial/ Developmental	55.39	--	13.75	29.18	12.46	6.61
ASE/GED	43.79	6.07	--	29.18	8.54	6.61
General Studies	51.07	--	13.75	29.18	8.14	6.61
All Categories	\$ 65.34	\$ 3.16	\$ 11.87	\$ 29.18	\$ 21.13	\$ 21.13

Equalization Grants

22. Any district whose "local tax ability" per in-district FTE falls below an "equalization threshold" would receive an equalization grant per in-district FTE equal to the difference between these two amounts. "Local tax ability" per in-district FTE would be the district's most recent actual EAV per in-district FTE multiplied by the standard tax rate (i.e., the accrued statewide tax revenue for the most recent historical year divided by the most recent statewide EAV). The "equalization threshold" would be the accrued statewide tax revenue for the most recent historical year divided by the statewide in-district FTE for the most recent year.

This recommendation is different from the equalization formula used in the FY1980 IBHE recommendations in three respects:

- a) The standard tax rate is based upon the statewide weighted average (now 19.3¢) rather than the median (now 19.0¢). This change in basic tax rate would increase equalization by approximately \$300,000.

- b) *The equalization threshold would be based upon an historical, rather than a projected FTE. Use of historical data rather than projections in FY'80 would have increased the BHE's budget recommendations for equalization by approximately \$1.5 million. The appropriation passed by the General Assembly and signed by the Governor for FY'80 was based on a threshold which closely approximates this procedure, even though it was not utilized in developing the BHE's budget recommendations.*
- c) *In the current plan no equalization is provided for the 1¢ of the standard tax rate set aside for public service. Equalization of local tax support for public service would increase equalization support by approximately \$1 million.*

23. Any district whose tax rate falls below the standard tax rate (see 22 above) and whose tuition per FTE exceeds 20% of the district's instructional cost per FTE would receive an equalization grant equal to 50 percent of the amount per in-district FTE needed to raise the district's most recent EAV multiplied by the district's tax rate plus any equalization grants (calculated under 22 above) up to the equalization threshold.

*This recommendation provides half of the amount needed by districts who cannot reach the equalization threshold because of a maximum tax rate below the state standard. Approximately six districts would receive these grants. The total cost would be between \$1.0 and \$1.5 million under current conditions.*

24. Once an appropriation bill for community colleges has been passed by the General Assembly and signed by the Governor a distribution would be made to community college districts utilizing data from the preceding year. The FTE enrollments utilized in resource requirements calculations (see 4 above) would be the basis for this distribution. The entire appropriation would be distributed, but payouts would continue to be made on a quarterly basis.

*This recommendation has no impact on resource requirements. Community colleges would know their level of state support early in the fiscal year.*

#### Targeted Tuition Subsidy

25. The Targeted Tuition Subsidy program proposed by the Illinois Council of Community College Presidents should be considered in the broader context of the Board of Higher Education's study of Student Access and Choice. The Committee to Study Community College Finance urges favorable consideration of this proposal.

Illinois Community College Board

COMPARISON OF COMMUNITY COLLEGE FUNDING PLANS FOR FY1980

	FY1980 Appropriations (Approved by the General Assembly and the Governor)	FY1980 Proposed New IBHE Committee Plan
Enrollment Projections	167,000 FTE	167,000 FTE
State Appropriations for Apportionment Grants:		
Credit Hour Grants	\$103,252,400	\$107,386,013
Equalization Grants	17,200,000	20,360,796
Disadvantaged Student Grants	4,700,000	4,700,000
Total State Appropriations for Apportionment Grants	<u>\$125,152,400</u>	<u>\$132,446,809</u>
Other Resource Requirements:		
Student Tuition/Fees	\$ 65,631,000	\$ 58,852,221
Local Tax Contribution (18¢ for Instruction)	93,742,000	---
Local Tax Contribution (1¢ for Public Services)	6,349,000	---
Local Tax Contribution (19.3¢ for Inst. & Pub.Serv.)	---	98,097,009
Other Local Revenue (Public Service?)	8,246,000	---
IOE & Other State Revenue (Instruction?)	10,608,000	---
IOE Revenue (ABE/GED)	---	4,157,942
Federal Revenue (Instruction?)	23,029,700	---
Other Federal Revenue (Public Services?)	583,300	---
Other Federal, State and Local Revenue for Instruction	---	29,244,099
Other Federal, State & Local Revenue for Public Serv.	---	10,145,468
Other State Categorical Support to Community Colleges Through ICCB	---	400,000
DAVTE Vocational-Technical Grants	11,800,000	11,800,000
Total Other Resource Requirements	<u>\$219,989,000</u>	<u>\$212,696,739</u>
Total Resource Requirements (State Apportionment Grants and Other Resource Requirements)	<u><u>\$345,141,400</u></u>	<u><u>\$345,143,548</u></u>
Average Credit Hour Grant Rates:		
Baccalaureate	\$26.01	\$26.01
