

**Sauk Valley Community College**  
**March 16, 2026**

**Action Item 5.9**

**Topic:** Sole Source Procurement – Unetixs Vascular

**College Health Metric:** Academics – The College provides quality, contemporary, and relevant educational opportunities to the community.

**Presented By:** Drs. David Hellmich and Jon Mandrell

**Presentation:**

The Diagnostic Medical Sonography Program is a key part of Sauk Valley Community College’s healthcare workforce training efforts and prepares students for careers supporting regional healthcare providers. As part of the program’s instructional buildout, the College must acquire specialized vascular diagnostic equipment that aligns with current clinical practice and allows students to develop the competencies required in professional healthcare environments.

The Sonography Program is requesting approval to purchase the MultiLab Series II Roodra Vascular System with DICOM manufactured by Unetixs Vascular, which will do the following:

- Provides advanced physiologic vascular testing capabilities used in clinical diagnostic environments;
- Allows students to gain hands-on experience performing procedures consistent with professional practice;
- Aligns with equipment used by the college’s clinical partners, supporting consistency between classroom instruction and clinical training; and
- Supports the continued development of the Diagnostic Medical Sonography Program, and helps address regional demand for trained healthcare professionals.

Based on the college’s evaluation of available systems, no other known vendor is capable of providing equipment that meets the college’s instructional and clinical alignment requirements. Section 20-25 of the Illinois Procurement Code (30 ILCS 500/20-25) and SVCC Board Policy 305.01 allow contracts to be awarded without competitive solicitation when there is only one economically feasible source for the required equipment. This procurement also complies with Uniform Administrative Requirements for Federal Awards (2 CFR 200.320) applicable to purchases funded through federal grant programs.

**Funding Source:**

The purchase will be funded through the Pipeline for the Advancement of the Healthcare Workforce Grant, which supports the development and expansion of healthcare workforce training programs.

**Recommendation:**

The administration recommends the Board approve the purchase of the MultiLab Series II Roodra Vascular System with DICOM from Unetixs Vascular in the amount of \$42,190 to support the instructional needs of the Diagnostic Medical Sonography Program.
