

Illinois Program of Study Expectations

The Carl D. Perkins Career and Technical Education Improvement Act of 2006 (Perkins IV) calls for states to create secondary-to-postsecondary sequences of academic and career technical (CTE) coursework that lead students to attain a postsecondary degree, or industry-recognized certificate or credential.

Specifically, Perkins IV mandates that Programs of Study (POS), at a minimum:

- Incorporate and align secondary and postsecondary education elements;
- Include academic and CTE content in a coordinated, non-duplicative progression of courses;
- Offer the opportunity, where appropriate, for secondary students to acquire postsecondary credits; and
- Lead to an industry-recognized credential or certificate at the postsecondary level, or an associate or baccalaureate degree.

A program of study is a structured sequence of academic and career and technical education courses that lead to a postsecondary-level credential (United States Department of Education, Office of Vocational and Adult Education, 2010)

Cluster: _____ Pathway: _____ Program of Study with 6 digit CIP: _____

Partnership Team (Postsecondary Perkins or PCCS Grantee): _____

Potential Credentials Earned within the Program of Study: _____

The work reported herein was supported under the National Research Center for Career and Technical Education, PR/Award No.VO51A070003 administered by the Office of Vocational and Adult Education, U.S. Department of Education. However, the contents do not necessarily represent the positions or policies of the Office of Vocational and Adult Education or the U.S. Department of Education, and you should not assume endorsement by the Federal Government. This work was also support through technical assistance from the Academy for Education Development. The state would also like to acknowledge the assistance of the University of Illinois' Office of Community College Research and Leadership and Illinois State University's Illinois Center for Specialized Professional Support.

Overview

The **Illinois Programs of Study Expectations Tool** is designed to be an interactive instrument to help educational partners ensure they are meeting both the federal Program of Study requirements AND the high standards set in Illinois. It is intended to guide a Partnership Team - or an internal self-review team - through the various Expectations and quality indicators.

The intended audience for this tool is primarily those educational partners funded by Perkins, Title I and Perkins, Title II. This includes:

- Partnerships for College and Career Success;
- Education-for-Employment Regions;
- High schools;
- Community Colleges

The tool is organized around the **six guiding principles for implementation and evaluation of Programs of Study**. These principles are intended to assist stakeholders in the implementation and evaluation of Programs of Study. The guiding principles foster systems thinking and change at all levels of education, especially the secondary and postsecondary levels. They are based on research and promising practices that support systemic reform, educational change, and continuous improvement.

Using the Tool

Each page of the tool highlights a different guiding principle. The user is asked to consider the specific principle and associated “*design elements*” in order to make a determination of overall “Expectations.” To simplify and expedite this effort, the principle/design elements have been grouped together based on similar characteristics. The “*Evidence*” column demonstrates the possible ways the design element can be achieved. The “*Examples of Acceptable Supporting Material*” column provides examples of materials that can be used to verify implementation.

The tool includes the following items:

- POS Principle and Description
- Related Office of Vocational and Adult Education (OVAE) POS Components
- Associated Perkins IV POS Requirements (from the federal law)
- Related POS Design Elements
- Evidence
- Examples of Acceptable Supporting Material
- Status

Determining Status

Ultimately, the Partnership Team is asked to determine whether or not the POS project complies with the various compliance items **and** if the project has achieved any or all of the quality items. It requires significant knowledge of the POS being analyzed, and the Illinois POS approach in general. This is not a simple task, and it cannot be accomplished without a significant investment of time and resources to examine the entire scope of the project.

Next Steps – Formulating a Problem Statement – **already completed as part of the FY12 Postsecondary Perkins Grant submission**

After a thorough review has been completed, it is critical that the result be carefully considered by the Partnership Team and/or any relevant stakeholders. A facilitated conversation amongst the Partnership Team can help begin the process of formulating a Problem Statement as developed in (FORM Y).

A problem statement is a clear, concise description of a specific problem(s) or opportunity for improvement to be addressed by the Partnership Team. The Problem Statement will be used to assist the Partnership Team in focusing work to be completed in regards to the Programs of Study selected for continuous quality improvement, keeping the team on track during the effort, and using the information gathered to validate the effort worked toward delivering an outcome that assists in providing solutions to the overall Problem Statement.

The Problem Statement will be developed for each Partnership Team based upon work completed as part of the Illinois Program of Study Expectations Tool and addresses those areas specifically in which the team feels additional work or emphasis will need to be accomplished. This documentation will be acknowledged in the “Status” column of the Illinois Program of Study Expectations Tool as “Working Towards.”

We ask that the Partnership complete the following:

1. Identify the top (3) problem(s)/opportunities for improvement in which the team deems most relevant to explore based upon the information gathered in the completion of the Illinois Program of Study Expectations Tool.
2. Formulate a (1 to 3) sentence problem statement for specific item outlined by the team in need of improvement or identified as an opportunity for improvement that is most urgent and relevant to the team right now.
3. Complete related questions associated with the problem/opportunity for improvement as outlined in Form (Y)

This Problem Statement will ultimately maximize the strengths of the POS, overcome identified barriers and enhance student success in the region. This in turn is an effective way to launch a coordinated continuous quality improvement process.

POS Principle 1: Leadership, Organization and Support

Programs of Study are developed, supported, and led with guidance from collaborative partners.

OVAE POS Components: #1 Local Policy Development, #2 Partnerships

Perkins IV POS Requirements	Design Elements	Evidence	Examples of Acceptable Supporting Materials	Status
