

## Associate in Science (851)

---

This program prepares students to transfer to four-year institutions to pursue a bachelor's degree in economics. **Students who have already chosen the university to which they plan to transfer should consult that institution's catalog or department advisor and an SVCC counselor or academic advisor in planning their program.**

### Work and Employment

---

Economists seek careers in financial institutions and other aspects of business and government. Economists can also be self-employed as financial advisors or compete for some jobs with business graduates.

### Special Considerations

---

Students planning to major in economics should cultivate effective oral and written communication skills and computer literacy.
