

(824) Associate in Science

Community college students interested in completing bachelor's degrees in Criminal Justice and related majors are strongly encouraged to complete an Associate in Science (A.S.) degree prior to transfer. Since admission is competitive, however, completion of these courses alone does not guarantee admission.

Note: Students should be knowledgeable in the use of computers, i.e., be able to negotiate an operating system; access the Internet; and use word processing, database and spreadsheet software.

Students who have already chosen the university to which they plan to transfer should consult that institution's catalog or department advisor and an SVCC academic advisor in planning their program.

Individualized articulation sheets for some universities are available in the advising office.
