

(H71) Certificate

The purpose of the Certified Manufacturing Assistant program is to meet industry requirements for employees with essential knowledge, skills, and attitudes to successfully perform as entry-level workers in any manufacturing organization.

Work and Employment

The SVCC Certified Manufacturing Assistant program is designed to train entry-level manufacturing employees. These would include machinery maintenance workers, repair workers, general assembly workers, and other entry-level workers. This certificate is an excellent introduction into any of Sauk's manufacturing certificates or AAS degrees.

Special Considerations

To obtain employment in a manufacturing plant, most individuals will be required to possess a high school diploma or GED. A drug test has become customary in most manufacturing companies before hiring.
