

Operating Equipment in 3H06

Turn on Projector:

Press the “On” button on the Projector Remote labeled **EPSON**.

Select the desired component to project:

To **project the Computer**, press **A** on the Kramer switch.

Turn the computer and the computer monitor on if necessary by pressing their power buttons and operate the computer and you normally would. The computer is located in a pull out drawer on the left-hand side of the computer desk

To **project the document presenter**, press **B** on the Projector remote. Turn on the document presenter by pressing its Power button.

To **project the microscope**, press **C** on the Projector Remote. Operate the microscope as you normally would.

To **play DVD's**, make sure the computer is selected as the primary output device and insert the DVD into the computer disc tray. Operate the DVD through the computer.

Volume Control:

Adjust the volume by using the MASTER VOLUME CONTROL knob on the amplifier.

When Finished:

Turn off the projector by pressing Standby (2 X) on the Projector Remote. Turn off the document presenter.
